

# CONSERVATION FIELD PHOTOGRAPHY FOR LAND STEWARDS TOOLS FOR IMPROVING FIELD PHOTOGRAPHY TECHNIQUES

Our goal is to create a conservation awareness and conserve nature through photography and education

## A TWO-DAY WILD9 PRE-CONFERENCE SESSION TO LEARN CONSERVATION FIELD PHOTOGRAPHY SKILLS

**What you will learn** • Digital photography techniques –shutter speed, f-stop, ISO, composition, natural lighting • Digital photo management techniques using Adobe Lightroom and Photoshop • Photography ethics for land stewards.

**Field photo shoots** • Two field sessions to improve skills and learn new techniques • Each participant will receive individualized instruction and evaluation of their techniques.

**What you should bring** • Digital camera & manual (required), laptop (with Adobe Lightroom recommended).

**Who should attend** • The course is designed for beginners and intermediate photographers who want to improve their technical skills and artistic creativity.

**Course fee: US\$90** • Fee includes CD of course materials, conference facilities, transportation to field locations (exact locations to be defined).

Course will be taught in English.

“The photography and graphic design workshop was right on target. It addressed the primary themes in a practical and instructive manner. I greatly appreciate the instructors’ willingness to share their knowledge and experience. They helped us realize our potential and capacity in communicating our conservation efforts using photographic images –thank you!”
